Homeopathy in India is a much needed alternative to allopathic medicines. This is probably the best opportunity to understand the concepts of Homeopathy. About Homeopathic Medicine, Homeopathic Medicine is an alternative form of medicine and a system of treatment that originated in India. Homeopathy is a method of diagnosis and treatment that is based on the belief that there are health conditions that are best treated with natural substances that produce symptoms in a healthy body. Homeopathic medicines are made from natural substances that are considered to have a powerful curative effect on the body. Homeopathy — the practice of medicine — was developed in Germany in the 18th century. In the 19th century, homeopathy became the foundation of the system of treatment, known as 'allopathy.'. Homeopathy: The Complete Textbook of Homeopathy Homeopathy; The Complete Textbook of Homeopathy This text gives the original medical prescription to cure the sick and the reasons for the use of homeopathy as a primary medical system. It is an easy to understand treatment system, which uses common substances to produce homeopathic effect in the body. Homeopathic solutions may be safely applied to the skin, mouth, or mucous membranes. In some countries and other areas, homeopathy is used to cure the sick and prevent the development of diseases, and it is the first choice of health care practitioners. While homeopathy is an alternative medical system, it does not use drugs, herbs, or other products that have side effects and are considered ineffective by most conventional physicians. Homeopathy is also different from other alternative medicine in that it is a family of alternative therapies that use simple substances that work on the body's immune system to help it maintain health. In this, there are two basic views. One is that the body has a healthy natural mechanism that maintains health; and that when this is disturbed or damaged, the body becomes sick. This concept is referred to as the "substrate theory." The other view is that the body does not have such a healthy mechanism, or that it is not the body's own mechanism that maintains health; that this is a survival mechanism which has been developed by evolution. This concept is referred to as the "non-substrate theory." In the two theories
