user follows the simple steps on the Apple.com website to register and create an account, they will be able to ask a question on Ask Apple. In addition to receiving answers from a live Apple spokesperson, users who have submitted a question will also receive a response from Apple in addition to other users who have asked the same question. Questions are also sent by Apple to Apple Stores for answers from Apple Store employees. Although Ask Apple was originally only available on the iPhone and iPod Touch, the app is compatible with all devices running iOS v 3.0 or later. Features Users can create an account by creating a username and password. After registering, users are given a question to ask and d4474df7b8
