DVB Dream Crack+

The KEYMACRO TV software is a tv application that allows you to view tv channels online, while you can also record shows, view statistics and analyze streams. Strip Off the Tacky Manner and Seemingly Minute Changes A graphic interface of sorts. The interface is supposedly designed to mimic the channel list screen, which is a neat feature. You can select stations by clicking on them, making it one of the few tv applications that can select multiple channels at once. Recording Channels It allows you to record multiple channels at once and save them in MPEG-2, MPEG-4, TS, MOV, FLV and AVI. Options and settings The application offers many options, such as Pid Statistics, Multi Pip, time shift, on/off function, clean display, and advanced options. The application is also fairly responsive, so you can find out your settings very quickly, even when you are recording channels. The application supports many brands. Thus, it can work with any of your DVB cards and satellite receivers. It is compatible with Windows 98/ME/2000/XP. It is a downloadable application. There is no installation process to go through. You can download the application on your PC from www.keymacro.com. It is compatible with Windows 98/ME/2000/XP. Pros You can record several channels at the same time. You can also view stream statistics. You can view the program schedule of your channels. The interface is designed well, in a way that it resembles the channel list screen. It is compatible with many different sets. Cons It has only a PC-based and not a web-based version. It is not as reliable as it should be. It still has some bugs that need to be ironed out. Some say that the interface is not compatible with Mac OS. Conclusion The KEYMACRO DVB software is certainly worth trying out. The features are solid. The application is compatible with many different brands and is affordable. It is basically a very affordable option. It has a clean interface and the ability to record multiple channels at the same time. To start viewing, select 'DVB (DVB/C++)'. Then, you will be required to log in to your Dreambox's internet settings. For internet connection issues, refer to the Dreambox user manual 1d6a3396d6
