What's New in the Funny Face?

Have you ever wondered what a picture of a baby with an evil look on its face would be if we could add a scary look, or a happy, pleasant expression to it? Well, you now can...Design your own funny face, no programming skills required. Put it on your pictures and share it on the Internet! See also: FaceMaker FacePainter, - Shockware.com by Dreamsmith, Inc.Q: ArrayList issue java I am trying to get a list of all words in a file that starts with a specific word(i.e word1) and return that as an arraylist. However the ArrayList that I have only contains the word i am searching for and when I try to iterate through it, it doesn't do so. I am just not sure what the issue is. My code is below: public ArrayList getNames(String word) { try { String wordsFileName = "resources/words.txt"; BufferedReader br = new BufferedReader(new FileReader(wordsFileName)); String temp; ArrayList wordList = new ArrayList(); while ((temp = br.readLine())!= null) { if (temp.startsWith(word)) { wordList.add(temp); } } br.close(); return wordList; } catch (IOException e) { System.out.println("IO Exception in getNames()"); e.printStackTrace(); } return null; } The file that i am searching for is as follows: tree Cabane Symphony I am looking for it to return: tree Cabane A: You are clearing the list each time you enter the while loop. This means that the list is always going to be cleared before it is set with the file contents. One simple fix is to add your line: wordList.clear(); above the return statement. This will ensure that the list is set to the empty values when you exit the function. Tuning the Electronic Properties of MXenes through High-Level Density Functional Theory Calculations. MXenes

System Requirements:

Specifications: 1. Recommended specs 2. Minimum specs 3. Virtual machine tests 4. YouTube testing 5.
