Jan 18, 2014 Oct 05, 2017 Jan 28, 2019 A: since early bsp there is also a If there is a steamworks dump then you are missing a c++ dll, this is because steam API early on used c++ and so steam includes c++ dll, but as it grew there was a switch to c# which resulted in some steam API dll not having the c++ dll for it. Due to this you have C# versions of SteamAPI that include a dll, but the steam client does not link against the C# version. you can track which steam API version you have in steam by typing steam in the command line and look in the attributes of the steamapi dlls.
