The problem is in the new version,
removing the whitespace after " "
and before " ". Either update your
IDE (see the second comment here:
or force the version of the source to
be 1.4.2.1.1. Whitespace is not

supposed to have in this file, I checked several files. Q: Moving items from an array inside a for loop in Python This part of the code below is causing an error in my application. The code below is supposed to load the various UCI data files and then load their content into numpy arrays. After that, I want to pass the loaded numpy arrays into

a for loop to perform some processes on each row. For now, I am trying to print each numpy array, row by row to check if this loop works correctly. But my code always crashes with this error: fatal Python exception error: [Errno 22] invalid mode ('rb') or filename The reason is probably because I am trying to read an array inside the for loop with a mode=rb

(read bytes). How can I load and pass the numpy array to the for loop?

Many thanks. import numpy as np
import glob files =

glob.glob(r'C:\...*.dat') # This is

where the problem is for f
