The following studies were designed to evaluate the importance of endogenous cerebroside sulfate glycolipid in survival of nerve cells in tissue culture. Brain gangliosides were isolated after the release of the fraction sialylated by sialyltransferase activity from cells of the murine neuroblastoma cell line 2BS. Following 2 days of 2 microM brefeldin A-treatment, the total amount of gangliosides was about doubled. The ganglioside fraction released upon depolarization by the K+ analogs Na+, K+, and NH4+ was extracted by TLC on silicic acid and purified further by column chromatography on Sephadex LH-20 and RP-HPLC on a RP-C18 column. Its N-glycolylneuraminic acid content exceeded 80%, together with an

What's New In Stock Spread Calculator?

Stock Spread Calculator is a professional software for calculating stock spread in the stock market. It is an easy and fast way to calculate stock spread.
