With a heavy, detailed virus scan process in place, you can expect a healthy refund. One of the two programs. They do both have their own unique features that are hard to find in the other two. I am not needed because I have found many music systems. They will usually tell you that your USB drive is infected and the only thing you can do about it is buy a new hard drive and transfer your programs and files onto it. Windows did not make it as easy as they did with Windows XP. The biggest downside to the later versions of Windows is that users are kept from removing support for Windows XP. I have reviewed for many years a lot of antivirus software. VirusDesk 2013 Plus is the only antivirus software that's been reviewed by more than 2 antivirus companies and is recommended to be used to the most of the Antivirus companies. This software has been tested thoroughly and it has a good performance. The software does not have unnecessary wizards. This software is very reliable.
