Creating a montage When creating a montage, you combine images into one file as a single image. To create a montage, follow these steps: 1. Open a file. 2. Locate the image(s) you want to montage, as shown in Figure 1-2. 3. Drag the image(s) onto the Photoshop image window. 4. Click OK. You can place the images you create in the order you want them to appear in the file (refer to Figure 1-3). All the images remain in a separate layer, so you can edit each one separately if necessary. **Figure 1-3:** The images remain layered until you convert them to an image file. Adding text Use the type tool to add type to a graphic image. To add text to a graphic image, follow these steps: 1. Open a file. 2. Locate the graphic image you want to add text to. 3. Click the type tool. A text box (see Figure 1-4) appears on the image. 4. Type the text you want in the text box. **Figure 1-4:** The text appears in the text box. 5. Click outside the text box to place the type in the image. You can arrange and resize the type, just as with any other piece of text. **Figure 1-5:** You can arrange and resize the type as you like. CTLA-4, one of the immunosuppressive receptors, has been shown to deliver a potent inhibitory signal to T cells, and its overexpression can lead to a state of anergy. CTLA-4 is expressed on T cells following the TCR/CD3 complex ligation or the engagement of costimulatory molecules. In this study, the analysis of Ag2-induced CTLA-4 activation was investigated. Flow cytometry analysis showed that Ag2 could trigger CTLA-4 internalization and that endocytosis was regulated by the phosphatidylinositol-3-kin
