Windows NT 4.0 Service Pack 3.Q:  
How to use cookie in ASP.NET MVC  
4 Web Api I want to set cookie on  
client side in ASP.NET MVC 4 Web  
API. How do I do that? I want to set  
a cookie value on client side in  
Client which may decide what kind  
of content to return. A: I have  
implemented this based on the  
sample code from link - In the  
controller action, when we want to  
add a user to cookie based on user  
login - [HttpPost] public  
ActionResult  
Index([FromBody]string user) { if  
(Request.Cookies["user"] == null) {  
Request.Cookies["user"] =  
Guid.NewGuid().ToString(); } if

Any file is copied to the floppy disk. Windows NT 4.0 Emergency Repair Disk

---

Download . How to Create an Emergency Repair Disk for Your NT 4.0 (Server or. September 23, 2006 4:50PM. Title: Create an Emergency Repair Disk for Your NT 4.0 (Server or. While this is the case for Windows 2000, I've never been asked to make an emergency disk when I've been the one to install the software. When another user has installed a full copy of Windows 2000, it seems that they would be left with a backup utility, but I have never used it. A: Based on the other answer, my answer is probably not helpful. If it's a user-generated emergency, you can ask for the user's password. If the machine is password protected, they can use an account with sudo rights. For Unix, that means using a root account. At the command prompt,

---

run this to ask for a password: `sudo -s` If the current user does not have sudo rights, this will prompt the user to enter a password. If the machine is password protected, enter the password and hit enter. If the machine is protected with a specific disk password, this command can be used to type it: `chntpw` If you have a Windows disk you can use that to boot your Windows emergency CD. See United States Court of Appeals
