What is the significance of Gaige the Mechromancer being a playable class in Borderlands 2? What is the significance of Gaige the Mechromancer being a playable class in Borderlands 2? Borderlands 2 has a few things that don't make sense to me: 1) Gaige the Mechromancer doesn't get a BONUS SPECIALIST SKILL at level 30 like the Gunzerker (learns melee skills, mostly meant to replace the Jackal's bullet shot), but is instead given the ABILITIES, more akin to the Siren. 2) Gaige's damage, though extremely high, doesn't do enough damage to be considered "dealer's" level damage (only level 60's are). What are your thoughts? EDIT: As a note, I have the GOTY version, both character DLCs checked off and installed. A: Both of those are correct. First, Gaige is a class that is meant to be, from the start, a bit different in play style. She's meant to be in a completely different role from the other classes (meaning she does not have a specific role) and is meant to use completely different weapons. She, along with Zer0 and Jackal are the only classes who can be scaled for use on any one of the three different damage types (melee, projectile and gun). The ABILITIES are her main tool in playing the class, which is to scale her 'damage' and use it as either an auto-damage over time effect or as a skill buff that makes her damage the next time she does her attack. Her 'specialist skills' are intended to allow the player to use her abilities in any given situation that might call for them. The 'machina' skill is a skill that is meant to enhance the effect of her ABILITIES (meaning if she's doing damage through them, it'll put out more damage) and focus it specifically at the target. When used the skill gives the player a choice between buffing her next strike or letting her 'charge' the damage for the next strike, as if she had fired her ability in the time between her two strikes. Zer0 does that slightly differently, allowing her to opt for taking less damage from the next hit. The weapon skills are meant to be about adding damage to whatever kind of weapon she's holding at that time, making it so that even though her ranged attacks don't deal more damage than they normally would, they're able to
